

## Cortez Hudson

Dallas, GA | cortezhudson@protonmail.com | (248) 508-8371

### Professional Summary

Highly disciplined, technically inclined professional transitioning from heavy commercial logistics and hazardous materials transport into Data Center Infrastructure operations. Proven track record of executing strict Standard Operating Procedures (SOPs), managing high-value assets, and maintaining 100% safety compliance under pressure. Hands-on technical background building and maintaining custom computing platforms, administering Linux-based environments, deploying containerized applications, and isolating hardware failures.

### Core Tech Skills & Endorsements

- **Licensing & Safety Credentials:** CDL Class A | Hazardous Materials Endorsement (HME) | Tanker | Doubles & Triples
- **Operating Systems & Administration:** Linux (Debian, Ubuntu, Fedora, Arch), Headless CLI, Bash Scripting, Docker & Docker Compose
- **Hardware & Break-Fix Infrastructure:** Custom System & Server Assembly, Component Replacement (CPU, RAM, GPUs, Storage, Cooling), Low-Voltage Multimeter Testing, Motherboard POST Debug LEDs, Logic-Board Repair
- **Networking & Cabling (L1–L3):** Cat6 Cabling & RJ45 Termination, Physical Link Diagnostics, IPv4 Static Addressing & Gateway Routing, TCP/UDP Port Auditing, DNS Sinkholing (Pi-hole)
- **Remote Access & Operational Discipline:** Secure Shell (SSH), Encrypted Mesh Overlays (Tailscale/WireGuard), SOP Execution, Change Management Safety, Chain of Custody Asset Tracking, DOT Compliance

### Self-Hosted Infrastructure & Systems Architecture | Homelab | October 2024 – Present

- **Headless Linux Administration & Remote Management:** Deployed and maintained a headless Debian production server; executed all configuration, routine maintenance, and service monitoring remotely via secure SSH sessions using CLI utilities.
- **L1/L2 Network Integration & Break-Fix:** Provisioned structured physical network drops for dedicated host infrastructure; diagnosed connection drops down to the physical layer, verifying RJ45 termination, switchport activity LEDs, and interface states.
- **Host Networking, Routing & DNS:** Configured static IPv4 addressing and default gateway routes across physical interfaces and virtual adapters deployed a network-wide DNS sinkhole (Pi-hole) for query filtering and client-level access control.
- **Encrypted Mesh Overlay Deployment:** Configured an encrypted peer-to-peer overlay network (Tailscale/WireGuard) to enable secure remote node access without exposing inbound ports to the public internet.

- **Containerized Infrastructure & Service Isolation:** Orchestrated self-hosted microservice stacks using Docker Compose; configured port mappings, persistent storage volumes, and network isolation to prevent service dependency conflicts.
- **Hardware Lifecycle & Fault Isolation:** Assembled and maintained multiple platforms, performing BIOS/UEFI firmware updates, PCIe lane/power distribution planning, and POST fault isolation using onboard debug LEDs and low-voltage multimeter testing.

## Professional Experience

**R+L Carriers** | Line Haul / P&D Driver | July 2022 – July 2025

- **Strict Regulatory Execution:** Successfully navigated rigid FMCSA and Department of Transportation (DOT) federal frameworks across 30 states with zero compliance infractions or safety incidents.
- **High-Value Chain of Custody:** Managed meticulous inventory and asset tracking documentation, verifying Bills of Lading and exact UN chemical identification numbers for bulk, hazardous, and multi-trailer loads.
- **Emergency Protocol Management:** Maintained strict situational awareness and adherence to federal emergency response regulations (ERG/FMCSR guidebooks) under high-consequence transport conditions.

**Werner Enterprises** | CDL Class A Driver | May 2021 – July 2022

- **SOP Adherence & Audit Compliance:** Ensured 100% audit compliance by maintaining high-fidelity logbooks and digital records, ensuring compliance with federal safety metrics, weight distribution profiles, and multi-point vehicle inspection sequences.

**220 Merrill** | Culinary Operations | April 2019 – June 2020

- **Inventory Allocation:** Executed high-volume ingredient logistics, precise tracking, and fast-paced operational handoffs under strict quality benchmarks in an upscale environment in Birmingham, MI.
